

BA – iNeuron – SQL- Assignment 7

1. Write an SQL query to show only odd rows from a table.

Ans: `select * from worker where worker_ID in (select worker_ID from worker where worker_ID%2 !=0);`

```
56 • select * from worker where worker_ID in (select worker_ID from worker where worker_ID%2 !=0);
```

WORKER_ID	FIRST_NAME	LAST_NAME	SALARY	JOINING_DATE	DEPARTMENT
1	Monika	Arora	100000	2014-02-20 09:00:00	HR
3	Vishal	Singhal	300000	2014-02-20 09:00:00	HR
5	Vivek	Bhati	500000	2014-06-11 09:00:00	Admin
7	Satish	Kumar	75000	2014-01-20 09:00:00	Account
NULL	NULL	NULL	NULL	NULL	NULL

2. Write an SQL query to clone a new table from another table. (Only Schema)

Ans: `create table worker_clone select * from worker where 1=0;`

```
58 • create table worker_clone select * from worker where 1=0;
```

```
59
```

```
60 • select * from worker_clone;
```

```
61
```

WORKER_ID	FIRST_NAME	LAST_NAME	SALARY	JOINING_DATE	DEPARTMENT
-----------	------------	-----------	--------	--------------	------------
